Hi Cathy

Attached are the slides we plan to use next week for the Water Resources meeting with Region 10 et al. that some of your staff will be attending/presenting.

Our presentation is pretty generic, and is more on the process – with some factual information regarding what is in the BiOps – but at a very high level. I believe that you guys have seen these slides already, the only new slide is number 9, which just gives an overview of the public comments – we don't get into the content of the comments because we are still in the process of looking at them, as are you guys.

Deliberative Process / Ex. 5

If you or your staff want to talk beforehand, we'd be more than happy to.

Could you guys please send the slides you plan to use as well?

Thanks,

Brian

We'll send you the powerpoint. It's very generic – i.e., comment period closed, # of comments received, we are evaluating comments. Can you send us your material as well?

Dear all -

I wanted to check with you about the following. You had told me that you wanted better coordination on our pesticides presentations.

I was just sent this meeting agenda from my folks.

I see that you re talking about the BiOp.

I also see that you are also talking about the BiOp comments. You told me that it would take you into October to analyze these comment so I am a bot confused about what will you be saying at this point.

We are talking about about the RPA/RPMs in the BiOp.

Since I do not want at debate over the BiOp - and you should not either - in this forum can you please let me know what you will be talking about please?

Cathy T.
